#### Rationale

The ratings factor in HDFC's (Housing Development Finance Corporation Limited) strong franchise and its demonstrated ability to grow in the competitive mortgage finance market, its focus on prime salaried customers within the home loan segment and its good asset quality indicators over credit cycles. The ratings also factor in HDFC's strong capitalisation (capital adequacy ratio of 18.6% with Tier-I of 17.3% as on December 31, 2019), moderate gearing (4.41 times as on December 31, 2019) and good profitability indicators. The company's ability to grow its loan book in in the highly competitive housing finance segment for prime salaried segment borrowers and the ability to maintain asset quality in the high-ticket builder book segment would remain key monitorable. In ICRA's view, HDFC's focus on growing its book while maintaining healthy interest spread, its competitive operating cost structure and tight control on asset quality would continue to support its earnings and solvency profile, going forward.

#### Key rating drivers

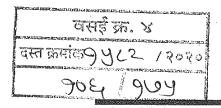

#### Credit strengths

Strong franchise, track record and market position – HDFC is the largest housing finance company in India. ICRA takes into consideration the strong franchise of HDFC with extensive geographical presence and its demonstrated ability to grow while protecting its margins in the extremely competitive mortgage finance market. HDFC reported an overall growth of 12% in portfolio (net of loans sold and ECL) on YoY basis to Rs. 431,600 crore as at December 31, 2019, up from Rs. 384,007 crore as at December 31, 2018 (Rs. 400,760 crore as at March 31, 2019) on ACM (Asset Under Management) basis, the portfolio grew by 14% YoY to Rs. 505,401 crore as at December 31, 2019 from 144,923 crore as at December 31, 2018, driven by 16% growth in individual loan book. Thereby increasing the share of individual loan book to 76% as at December 31, 2019 from 74% as at December 31, 2018. In the logising finance business the focus of HDFC has been on the salaried segment which is perceived to be less risky compared to the selling ployed segment. During 9MFY2020, 81% of individual loans approved in value terms were to the salaried glass.

Good asset quality indicators — Given HDFC's focus on the prime salaried segment its overall asset quality indicators remained comfortable at 1.36% as at December 31, 2019 (1.22% as at December 31, 2018). Gross NPAs in the individual loan segment remained lower at 0.75% vis-a-vis the non-individual loan segment at 2.91% as at December 31, 2018. ICRA

www.icra.in

Trusice of the state of the sta

expects comfortable asset quality owing to its focus on the prime salaried segment. Additionally, the company has adopted Ind-AS and identified stage 3 assets of Rs. 6,996 crore against which provisions of 49% have been made. Given the tough operating environment, it will be important for HDFC to maintain asset quality indicators in the corporate loan book which accounted for 24% of the portfolio on AUM basis.

Well diversified borrowing mix - HDFC's funding profile is well diversified, supported by its superior credit profile. A major portion of the company's funding is from the debt market borrowings (45% as on December 31, 2019), which has enabled it to maintain competitive cost of funds. Share of commercial paper in the borrowing mix decreased to 8% as on December 31, 2019 from 11% as on December 31, 2018. HDFCs strong franchise has also enabled the company to have a stable deposit base Rs. 1.25 lakh crore (32% of total borrowings as at December 31, 2019). The ability of the company to rollover its borrowings will remain a key rating monitorable. ICRA expects the company to continue to tap the debt markets in the near term, given the lower cost of funds.. However, like other HFCs, the company carries an interest rate risk on its portfolio given the relatively longer tenure of its fixed rate liabilities vis-a-vis its assets.

Stable profitability indicators maintained across cycles - HDFC's average yields increased in FY2019 to 9.81% from 9.54% in FY2018 due to increase of interest rates driven by an increase in its cost of funds to 7.87% in FY2019 from 7.59% in FY2018. The company's interest spreads remained broadly stable at 1.94% of average total assets (ATA) for FY2019 (1.95% for FY2018). Stable net interest margins (2.23% for FY2019), higher non-interest income¹ as % of ATA (0.98% ATA for FY2019) and lower operating expenses as % of ATA (0.35% for FY2019). The company reported a profit after tax (PAT) of Rs. 9,632 crore, including profit from stake sale of profit from stake sale in IPO of HDFC AMC worth Rs. 891 crore and GRUH Finance worth Rs. 314 crore during FY2019 as compared to PAT of 10,959 crore, including profit on sale of investments of Rs. 5,609 crore during FY2018 mainly on account of stake sale of HDFC Life. The company reported return on average assets (RoA) and return on average net worth (RoE) of 2.25% and 13.51% respectively during FY2019 as compared to 2.99% and 20.16% respectively during FY2018. The company reported a PAT of Rs. 15,537 crore during 9MFY2020, inclusive of the profit on sale of investments of Rs. 3,521 crore and fair value gain of Rs. 9,020 crore on derecognition of the investment in GRUH during 9MFY2020. During 9MFY2020, the company also made provisions of Rs. 4,693 crore.

Strong capitalisation profile – HDFC is adequately capitalised with a capital adequacy ratio 18.6% (Tier 1 - 17.3%) as on December 31, 2019 compared to 19.1% (Tier 1 - 17.5%) as on March 31, 2019 and 19.2% (Tier 1 - 17.3%) as on March 31, 2018. The company's gearing stood at 4.41 times as on December 31, 2019 compared to 4.87 times as on March 31, 2019. HDFC raised an equity capital of Rs. 11,104 crore through private placement in January 2018 and Rs. 1,896 crore through QIP in March 2018. Further, in October 2018 the Corporation further received a total amount of Rs. 5,384 crore on conversion of warrants, leading to strong capital adequacy indicators and comfortable gearing levels for the company. In ICRA's opinion, the entity remains well capitalised and its leverage levels remain comfortable at present. With the strong operating performance likely to continue and slippages remaining low, HDFC's capitalisation is expected to remain comfortable over the medium term.

#### Credit challenges

Managing asset quality in the large-ticket non-individual loan segment - As on December 31, 2019, non-individual loan segment comprises around 24% of the AUM. White the not individual segment is comparatively risky, the company has strong systems and processes to manage this dusing ss. Given the large ticket size and the high inherent risks associated with such exposure, the corporate more age loan book remains exposed to concentration risks. While the portfolio asset quality has been good (gross NPA of \$4.36%, as on December 31, 2019). The asset quality for the individual portfolio and

non-individual portfolio marginally moderated to 0.75% and 2.91% respectively as at December 31, 2019 from 0.68% and 2.46% respectively as at December 31, 2018. The company's ability to maintain asset quality will be important given the concentration risk in the high-ticket builder book segment.

Exposed to competition in the prime salaried segment – HDFC faces competition from banks and leading HFCs primarily while lending to the salaried borrower segment. The competitive intensity in the industry is expected to remain high over the medium term specifically while lending to the salaried borrower segment. In ICRA's view, HDFC's ability to grow its book while maintaining its profitability, asset quality and solvency profile will remain key rating factors.

#### Liquidity Position: Strong

The asset liability management (ALM) profile² as on September 30, 2019 of HDFC had a negative cumulative mismatch of °Rs. 6,379 crore in up to one year bucket i.e., a negative gap of only 1.28%. As on September 2019, the company carries liquidity in the form of bank balances, liquid fund schemes of mutual funds, deposits with banks, and investments in Government Securities worth °Rs 39,180 crore. Cushion is provided by flexibility to securitize/assign loan assets, demonstrated ability to rollover borrowings and high deposit renewal. The unaccounted gains of listed equity including the Corporation's subsidiary and associate companies stood at Rs 2.34 lakh crore as at December 31, 2019.

#### Rating sensitivities

**Negative triggers** - Negative pressure on HDFC's rating could arise if there is a deterioration in asset quality with Gross NPAs remaining above 5% on sustained basis or deterioration in capitalisation and earnings profile on sustained basis.

#### **Detailed Rationale**

CRISIL has assigned its 'CRISIL AAA/Stable' rating to the Rs 45000 crore non-convertible debentures (NCDs) of Housing Development Finance Corporation Limited (HDFC). The ratings on the other debt instruments and fixed deposits have been reaffirmed at 'CRISIL AAA/FAAA/Stable/CRISIL A1+'.

The ratings continue to factor in HDFC's leading market position and sound track record in the housing finance businesses, healthy asset quality, diversified and stable resource profile, and strong financial risk profile. These strengths are partially offset by exposure to intense competition in the housing finance segment.

CRISIL has also withdrawn its rating on HDFC's NCDs worth Rs 16,708 crore and bonds worth Rs 3.7 crore (See Annexure 'Details of Rating Withdrawn' for details), in line with its withdrawal policy. CRISIL has received an independent verification that these instruments are fully redeemed.

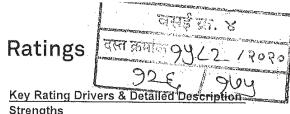

#### Analytical Approach

For arriving at the ratings, CRISIL has consolidated the business and financial risk profiles of HDFC and its subsidiaries and associates. CRISIL expects managerial and financial support to these subsidiaries on account of their strategic importance, majority shareholding and shared brand name.

Please refer Annexure - List of entities consolidated, which captures the list of entities considered and their analytical treatment of consolidation

Strengths

#### * Strong market position

It is india's largest housing finance company, with profitable growth over the past 40 years in the individual housing and corporate segments. While competition has increased over time, with the entry of new players and greater focus by banks on this segment, HDFC has maintained its market share. As on December 31, 2019, HDFC's loan book stood at Rs 4,41,472 crore, a growth of 13.4% over the previous year. Gross loans i.e. including loans sold, stood at Rs 505,401 crore as on same date (Rs 4,61,913 crore, respectively, as on March 31, 2019). HDFC Ltd also has sizeable presence in other financial services space including life insurance, general insurance, AMC and education financing business, through its subsidiaries.

#### * Healthy asset quality

Asset quality remains healthy. The gross non-performing assets (NPAs) as on December 31, 2019 was 1.36% (1.18% as on March 31, 2019 and 1.11% as on March 31, 2018). The NPAs have witnessed an uptick from March 31, 2017 levels (0.79%), largely on account of delinquencies in non-individual portfolio, leading to an increase in NPAs in this segment to 2.91% as on December 31, 2019 from 1.16% as on March 31, 2017. NPAs in the individual portfolio stood comfortable at 0.75% as on December 31, 2019. With the slowdown in the real estate sector and incipient stress for developers, HDFC's sizeable exposure to the builder and corporate segments will remain a sensitivity factor.

#### * Diversified and stable resource profile

The resource profile continues to be well-diversified, lending flexibility to HDFC's borrowings. The borrowing mix primarily comprises of market borrowings (45%) and fixed deposits (32%). The share of term loans in overall borrowings stood at 19% as on December 31, 2019. HDFC raised external commercial borrowings (ECBs) of US\$ 1.2 bn in fiscal 2019. HDFC's strong resource-raising capabilities, high fixed deposit renewals, and the high proportion of floating rate home loans in its portfolio mitigate the inherent tenure mismatch and interest rate risks in the housing finance business.

#### * Strong financial risk profile

Financial risk profile remains sound, marked by healthy capitalisation and earnings profile. As on December 31, 2019, HDFC (standalone) had an overall capital adequacy ratio (CAR) of 18.6% and Tier-I CAR of 17.3%. Networth stood at Rs 89,584 crore as on same date. HDFC raised Rs 13,000 crore capital in Q4FY18. Further, conversion of warrants led to ~Rs 5,300 crore increase in networth in fiscal 2019. Adjusted gearing of the company stood at 5.2 times as on Dec-19.

The earnings profile is marked by healthy interest spreads, low expense levels, and good returns on networth. The interest spread has been at 2.15%-2.35% over the past five years (2.27% for the first nine months of fiscal 2020). The return on assets stood at 4.3% for the first nine months of fiscal 2020 (on an annualized basis) including profit on sale of investment for the stake sale in Gruh Finance and profits from fair value change on account of de-recognition of investments in Gruh Finance to tune of Rs 12,541 crore.

RoA was 2.2% for fiscal 2019, including the one-time consideration that HDFC received from the gains of Rs 891 crore through the listing of HDFC Asset Management Company in the August 2018.

#### Weakness

* Exposed to intense competition in the housing finance industry

HDFC is exposed to intense competition in the retail mortgage loan segment especially from banks. Lately, with weak corporate loan demand, banks have kecome aggressive in the Retail mortgage space.

> प्रत्यम्य जयते ले. पाराय

#### Liquidity Superior

Given the longer tenure on asset side, the ALM profile (as on September 30, 2019) had negative cumulative mismatches in upto one year bucket. As on December 2019, HDFC's upcoming repayments stood at Rs 54,927 crore of debt (of which Rs 12,950 crore is commercial paper repayments) by March 31, 2020. Against this, the entity has liquidity of around Rs 27,501 crore in the form of bank balances, liquid fund schemes of mutual funds, deposits with banks, and investments in Government Securities as on December 2019, apart from inflows/ collections. Further cushion is provided by NHB refinance, flexibility to securitize loan assets, and adequate flow of monthly collections. The unaccounted gains of listed equity including the Corporation's subsidiary and associate companies stood at Rs 2.58 lakh crores as at December 31, 2019.

#### Outlook: Stable

CRISIL believes HDFC will maintain its robust credit risk profile over the medium term, backed by its healthy asset quality, and strong financial risk profile. Strong franchise and fundamentals will, likely, enable the company to maintain its competitive position, supporting its present ratings.

#### Rating Sensitivity factors

#### **Downward Factors**

- * Deterioration in asset quality with gross NPA ratio crossing over 3% on a steady state basis thereby impacting profitability
- * Weakening of capital structure with significant increase in gearing.

#### About the Company

HDFC, a housing finance company, was incorporated in 1977; its initial shareholders included the International Finance Corporation, Washington, and the Aga Khan Trust. As on March 31, 2019, HDFC's gross loans, stood at Rs 4,06,607 crore, of which 74% consisted of loans to individuals. Loans to corporate entities, lease rental discounting, and construction finance accounted for 5%, 9% and 12% respectively.

The company also has strong presence in life insurance, general insurance, asset management and education financing business through its subsidiaries - HDFC Life insurance company, HDFC Ergo, HDFC AMC and HDFC Credila respectively.

For fiscal 2019, on a consolidated basis, HDFC reported a profit after tax (PAT) of Rs 16,232 crore (post minority interest, profit from associates) on a total income (net of interest expense) of Rs 66,670 crore for fiscal 2019, as compared to Rs 11,980 crore (post minority interest, profit from associates) and Rs 55,101 crore, respectively, for previous fiscal. CRISIL Ratings is part of CRISIL Limited ("CRISIL"). We pioneered the concept of credit rating in India in 1987. CRISIL is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI"). With a tradition of independence, analytical rigour and innovation, CRISIL sets the standards in the credit rating business. We rate the entire range of debt instruments, such as, bank loans, certificates of deposit, commercial paper, non-convertible / convertible / partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 24,500 large and mid-scale corporates and financial institutions. CRISIL has also instituted several innovations in India in the rating business, including rating municipal bonds, partially guaranteed instruments and microfinance institutions. We also pioneered a globally unique rating service for Micro, Small and Medium Enterprises (MSMEs) and significantly extended the accessibility to rating services to a wider market. Over 1,10,000 MSMEs have been rated by us.
